- Memory

Contact our [Upgrade Center](#) for more info.

Need to know...

What is Delidded CPU?

For a better thermal heat transfer. The CPU lid is removed and thermal paste is placed over CPU die. The lid is then reattached.

September Laptop Tips from our Support Team

1. Extend your battery life by disabling both your Wireless and Bluetooth whenever possible.
2. To make your battery last longer, charge the battery to 100% and then unplug the AC Adapter. Do not have the AC adapter always plugged in.
